

FIAT 500X VOYAGER NEXT CONCEPT

BENEFITS

- Specially tailored to meet the millennial generation's demand for a connected and personalized lifestyle, HARMAN VOYAGER Next combines industry leading premium audio and connected car technologies. It features unprecedented speaker solutions, a removable subwoofer unit in the trunk and connectivity options to create a fully integrated entertainment experience.
- VOYAGER Next Connect App makes it easy to connect your smartphone to the car and individualize the car settings to your personal preferences. You can use the app to adapt in-vehicle lighting or control compatible in-home and portable devices.
- HARMAN KINETIC micro-speaker technology enables completely new integration options along with the possibility to enlarge the active, sound-creating surface and thereby improves efficiency. The scalable speaker array offers controllable dispersion characteristics with a large number of independently actuated pistons. The intelligent combination of micro-size and scalability reduces integration complexity.
- VOYAGER Next Sub redefines the conventions of automotive audio. Simply remove the portable full-range device from the trunk and pair it with multiple compatible smart audio devices to experience concert-like sound wherever you go.
