Technology

CLARI-FI™

- Compressing audio files can discard up to 90 percent of the original audio content captured in the studio.
- Clari-Fi automatically analyzes and improves the audio quality of all types of compressed, digital music sources.
- It transforms the listening experience back to a recompression era, by restoring lost signal.
- Delivers a rich, uncompromised listening experience from any compressed music source.

Solutions

QUANTUMLOGIC® SURROUND

- QuantumLogic® Surround Sound technology creates an unprecedented 5.1 channel surround sound listening experience from any mono, stereo, or multi-channel signal source.
- Revolutionary new audio algorithms extract signal streams and impulse responses from the original recording and give audio tracks a natural yet controlled sound quality.
- It is ready to work with all system architectures and only uses sources from the original material.
